### PROJECTS

#### • Car Rental System Using MERN

An online learning platform is a webspace or portal for educational content and resources that offers a student everything they need in one place: lectures, resources, opportunities to meet and chat with other students, and more. It is also an excellent way for the student and the teacher to monitor student progress.

My role in the project is to create and design interactive digital learning for a variety of learning experiences

#### • Emotion Detection using CNN

This project uses Convolutional Neural Networks to analyze facial expressions and classify emotions such as happiness, sadness, anger, and surprise. It enables automated emotion recognition, useful for applications in human-computer interaction and sentiment analysis.
